*This programme is implemented by the Collective Leadership Institute. The views expressed in this publication do not necessarily reflect the views of the European Commission.*

The European Union is made up of 28 Member States who have decided to gradually link together their know-how, resources and destinies. Together, during a period of enlargement of 50 years, they have built a zone of stability, democracy and sustainable development whilst maintaining cultural diversity, tolerance and individual freedoms.

The European Union is committed to sharing its achievements and its values with countries and peoples beyond its borders.

The European Commission is the EU's executive body.

European Union's Non-State Actors and Local Authorities Programme for Strengthening the Capacities of Non-State Actors for the Southern Mediterranean Region (multi-country)

## ENTIRE Project

Empowering Regional Civil Society Networks to take an active role in Integrated Water Resources Management in the Southern Mediterranean Region

This project is funded by the European Union

German Water Partnership

# Empowering regional civil society organization networks to take an active role in Integrated Water Resource Management (IWRM)

## The concept

ENTIRE is a two year programme, which aims at strengthening the role of civil society organisations in reforms, democratic changes and sustainable development of the water sector in the southern Mediterranean region (SMR).

The Collective Leadership Institute (CLI), the Arab Countries Water Utilities Association (ACWUA), the Arab Network for Environment & Development (RAED), and the German Water Partnership (GWP) are equal partners of ENTIRE.

Currently, several countries of the SMR are undertaking water governance reforms. New management practices, identification of new roles, responsibilities and priorities towards Integrated Water Resource Management (IWRM) are the most important challenges of the reforms. A strong emphasis is put on gender balanced and poverty-oriented aspects of water management.

The ENTIRE project works with organizations based in Algeria, Egypt, Jordan, Lebanon, Morocco, West Bank, the Gaza Strip, Syria and Tunisia. ENTIRE's main goal is to develop, implement and institutionalize participatory mechanisms to successfully involve stakeholders in fruitful dialogue. It supports the SMR countries with a proven methodology and tools to engage all relevant key stakeholders in integrated water reforms.

## The objectives

The project's intended results focus on:

- Improving multi-stakeholder dialogues on IWRM in the SMR by building capacity on stakeholder collaboration.
- Enabling civil society organization networks to deliver training programmes for the implementation and monitoring of stakeholder dialogue processes. The methodology will be included in the capacity building portfolios of participating organisations.
- Supporting continuous learning and best-practice exchange through a web-based support platform for the alumni of the training programmes and online tools on stakeholder dialogues for a broader audience.
- Making available best practice exchanges on IWRM and stakeholder consultation for knowledge sharing.

The action intends to raise awareness and build capacity of ACWUA's and RAED's member organizations focused on participatory stakeholder dialogue approaches. Long-term impact of the action will be the development of more sustainable water legislation with the participation of local communities. This should lead to better access to safe water supply and sanitation services for local communities.

## The Dialogic Change Model

Stakeholder dialogues provide a space for people to think together, a space that can help collective intelligence to emerge.

Our capacity building programme develops the knowledge and skills to implement stakeholder dialogues that lead to concrete results.

The center of our approach is the Dialogic Change Model. It explains in four phases what needs to be taken into account to foster engagement and collaboration.
