

WE WANT YOUR PROJECT STORIES!

ENTIRE is a two year programme funded by European Union. The main objective is to strengthen the role of civil society organisations in reforms, democratic changes and sustainable development of the water sector in the Southern Mediterranean Region (SMR).

The Collective Leadership Institute (CLI), the German Water Partnership (GWP), the Arab Countries Water Utilities Association (ACWUA) and the Arab Network for Environment and Development (RAED) are equal partners of ENTIRE.

As part of this project we want to promote and explain phase-by-phase how a successful stakeholder dialogue takes place in the area of water resource management.

Please send us case study examples from your region within the water sector. It can be a small/ large-scale project or any other relevant project that you are interested or involved in.

Project locations should be the countries such as Algeria, Egypt, Jordan, Lebanon, Morocco, Palestine, Syria and Tunisia.

We are looking for topics such as IWRM, Water Governance, Participation in Water Resources Management, Water Dialogue and Water Conservation.

Tell us about the challenges you faced but also about the moments of success and celebration. The selected cases will be showcased on our website and in our best practice handbook, which will be available in Arabic and English.

We encourage you to download further information and guidelines on our website:
